Trip Details

At Mefjord Brygge we have prepared top selection of winter activities. Most of them can be experienced individually (selfdependent basis) or as part of guided trip. Choose the best options to make your own Perfect Trip!

Sample day 1. Experience the Northern Lights dancing on the sky above you. The light green colors begin to ripple into the night, flowing, slowly growing and suddenly bursting across the sky. Pure Magic! [Experience can be self-guided or as part of a guided tour, from NOK 995 per person]

Sample day 2. Time for skiing or snowboarding. There is no lifts around. You can climb the mountain of your choice. Most likely, you will be the only one in the area having entire powder for yourself. Take a deep breath at the top and rush down the fresh powder all the way down to the sea level! :-) [Summit to sea skiing experience can be self-guided or as part of a guided tour, from NOK 3300 per group - on request]

Sample day 3. Whale watching has become one of the main reasons tourists visit Senja island in winter. Typically from around end of December until February we have big populations of killer whales and humpback whales coming to Mefjord. The whales follow herring that stays in the fjord over the winter. We always try to give the best possible experience for our guests. Depending on current season and weather condition we will make most of our Whale/Sea-eagle Fjord Safari [Guided Whale/Sea-eagle Fjord Safari trips from NOK 1095 per person]
